High Quality Fashionable Melange Yarn

Product Range

100% Cotton Combed & Carded, Cotton Blended with Polyester, Viscose, Acrylic, Modal in Ne 20s-60s for Knitting and Weaving Application & Above 40s from ELS Cotton / Micro Denier Fiber

MELANGE YARN

Cotton Combed	Cotton Blended	Multiblended
Compact	Vortex	Poly / Cot
100% Poly	Cot / Vis	100% Viscose

SPECIALITY YARN

Coloured Neppy Melange	Jaspe/Siro Yarn (Two/Multi Toned Grindle)	Raw White Jaspe/Siro Yarn
Ice Heather Yarn	Snow Heather(Inj Snow/Inj Spect)	Cloudy Melange
Brilliance Yarn	Flax Feel Melange	Jaspe/Siro with Neppy Melange
Neon Neppy Melange	Slub Melange	Triblends Melange
Jaspe/Siro Slub	Jaspe/Siro with Snow Melange	Stripe Melange
Injection Yarn		

PACKING

Waxed/Unwaxed Autoconed Yarn on cone, Available in Carton and Pallet

STANDARDS FOR MELANGE YARN

Fabric Details : Shade card fabric made in Ne 30/1 on Circular Knitting machine of 24 gauge, 96 feeded and 28" dia with 145-150 GSM of finished Fabric

Processing of Shade Card Fabrics:

- Washed in soft flow dyeing m/c at 70°C for 20 minutes & then cold wash, followed by drying fabric at 130°C.
- We have used cationic softner.

Light Source : D-65 (Primary)/TL-84 (Secondary)

- Fastness: a) Washing Fastness - Light Shade - 4 / Dark Shade - 3-4
b) Rubbing Fastness - Wet - 3-4 / Dry - 4

REMARKS

Any shade/speciality product can be produced in all blends as per customer's requirements.

Shade can be matched in any other light source as per customer's requirements.

Quantity as per customer's requirements.

Slight difference in shade might be observed due to different composition, Knit structure, Yarn count and Finishing Process.

KEY STRENGTH

Impressive Product Range

Unique customer-focused products.
Yarn & Fabrics.

Quality Assurance – in Every aspect

Excellence: Right from procuring raw materials till final delivery of products.
Adherence to: stringent quality norms, and international standards.

Marketing Skills

Expertise and having in depth knowledge on Markets, Brands , Fashion , Customer across Globe the person

Procurement

Ensuring superior quality at raw materials procurement for Cotton and other Fibres

Production

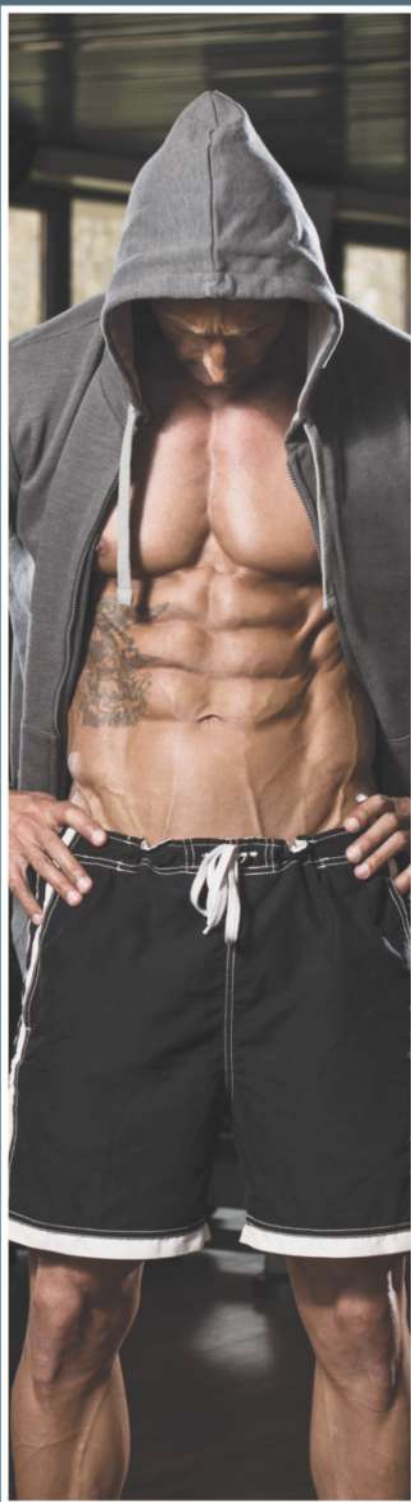

Installation of Uster Tester-4, Uster HVI Spectrum, Uster AFIS Pro, ZweigleHariness Tester-G566 and UsterClassimatQuantum.Latest technology equipment Jossi Vision Shield for contamination free yarn.Installation of Sensor-enabled Schlafhorst Auto Coner ensuring sophistication in yarn spinning thereby enabling homogenous quality yarn and better productivity. Mandatory usage of hand gloves, hair net, mask, aprons, etc., by employees for the twin benefits of safety and quality.

Delivery

Exclusive dedicated and specialized customer service team for sustained and improved customer satisfaction.

Sourcing, Production & Delivery

Inspection at every stage through well trained personnel to ensure stringent quality conformance.

MANUFACTURING CAPACITY

Excellence is an attitude

Segment	Capacity
Spinning	55,000 spindles to produce 10000 MT of Melange & Fancy yarns per annum.
Dyeing	Fibre Dyeing plant with capacity to Dye 15 MT / Day
Knitting	Will Start 8 MT per day in 2021
Power generation	6.4 MW captive power generation Plant with use of Rice Husk

Effluent Treatment Plant (ETP)

ETP is a positive measure towards sustainability. ETP is acclaimed as a trendsetter in textile industry as it commissioned its ETP with modern technology equipment. It has a capability to treat 5mn litres per day and recycle waste water.

Green Initiative

Cedar is committed to preserving this beautiful planet of ours for future generations. Majority of products are ethically sourced, processed and delivered; right from the use of organic cotton as raw material to the finished product and final delivery.

The company follows a policy of effective waste management and pollution control to protect Mother Earth. Some of these initiatives include:

- Effluent Treatment Plant (EFT) for waste water irrigation.
- Zero wastage. Zero pollution.
- 100% commitment to environment protection.

Afforestation

Our concern for Mother Nature is what drives us to take special initiatives in planting more than 1,00,000 trees and diligently explore advanced scientific methods of afforestation.

Solar Energy

We are in process of setting up Solar Energy in order to meet 20% needs of our power requirements from Solar.
